## PROJECTS

### 1. SpeakSmart- [Live](#) - [Client](#) - [Server](#)

**About:** This is a summer camp language school website where anybody can buy or sell any language classes.

**Technologies:** React (vite), React-Router, React-Icons, Firebase, Tailwind CSS, DaisyUI, React-rating, React-hot-toast, React-hook-form, Stripe.js, etc.

#### Features

- Different user roles, such as student, instructor, and admin. The admin can change the role of any user. Also can approve or delete the classes added by the instructors.
- An instructor can add, delete or update any classes. Can see if anybody is enrolled in his class.
- The students can select and pay for any class with the Stripe card payment system. They can see their selected and enrolled classes on the dashboard with also their payment history.

### 2. ThaiZest- [Live](#) - [Client](#) - [Server](#)

**About:** This is a Thai recipe blog website. There are some popular chefs who added their best recipes here.

**Technologies:** React (vite), React-Router, React-Icons, Firebase, Tailwind CSS, DaisyUI, React-lazy-load, React-to-pdf, React-toastify, etc.

#### Features

- Firebase authentication system. Users can log in or register with Google and GitHub Accounts. They can also use a name, email, password, and photo URL to register.
- The blog posts are secured. Nobody can see them without registering or logging in.
- The website is fully responsive on any size device. Such as mobile phones, tablets, and desktops.

### 3. Car's Doctor - [Live](#) - [Client](#) - [Server](#)

**About:** This is a garage website. Customers can book any service here.

**Technologies:** React (vite), React-Router, Firebase, Tailwind CSS, DaisyUI, sweetalert2 etc.

#### Features

- If a user tries to book a service without logging in, he will be redirected to the login page. After logging in, he can book a service. He can also cancel or confirm a booking from my bookings tab.
- The website is fully responsive on any size device. Such as mobile phones, tablets, and desktops.
